

BEFORE

SOLAR PANELS
INFESTED WITH
BIRDS?

INNOVATIVE
PIGEON
DETERRENT
SYSTEM

AFTER

The presence of nests of pigeons, doves, blackbirds, sparrows and other small birds on building rooftops can lead to dirt build-up causing major health hazards, as well as risking damages to the solar panels and the efficiency of the photovoltaic system.

Our bird blocking solution is the easiest and most efficient to install for shielding your solar panel system.

TOP SERIES

IDEAL FOR MOUNTING ON BIRD-INFESTED SOLAR PANELS

Highly resistant bird barrier designed to permanently prevent birds from accessing and nesting under solar panels.

Suitable for all situations, even in the most critical cases.

- ✔ It mounts under the solar panel frame using special clamps
- ✔ Stainless steel comb supplied in pieces 1.2 m long
- ✔ Alu-Stainless steel clamps available in Silver and Black color
- ✔ Does not require use of adhesives or silicone glue
- ✔ Comb designed with an Easy Cut system for manual cutting
- ✔ Universal for all types of solar panels and roof tiles

BASIC SERIES

IDEAL FOR PREVENTING BIRDS FROM NESTING UNDER NEW SOLAR PANELS

Medium-strength barrier designed for solar panels not yet infested with birds. Suitable for mounting in conjunction with the installation of new photovoltaic systems.

- ✔ Birds will no longer be able to access and nest under your photovoltaic systems
- ✔ It mounts frontally to the metal frame of the solar panel using special clamps
- ✔ Pre-painted and zinc coated steel comb supplied in coils of the length required
- ✔ Alu-Inox steel clamps available in Black color
- ✔ Does not require use of adhesives or silicone glue
- ✔ Universal for all types of solar panels and roof tiles

RESOLVING

Isidoro® System is a durable and unbreakable barrier. Thanks to our bird blocking solution, pigeons, blackbirds, sparrows, etc. will no longer be able to access and nest under your solar panels and will thus be discouraged from roosting on the roof.

ENDURING

Isidoro® System will protect your solar panels forever. Isidoro® System's high-quality materials ensure that our bird blocking solution is indestructible and long-lasting, which is why we can guarantee it for up to 25 years.

FAST

Isidoro® System mounts to solar panels in a quick and easy way. Our universal attachment system makes it compatible with all types of solar panels. The spikes and clamps are also adjustable, making future maintenance effortless.

PRACTICAL

Isidoro® System does not require any sophisticated tools. There is no need for screws or silicone glues, as these would damage the solar panels. All it takes is an Allen screwdriver to adjust the bird blocking solution on all kinds of solar panels and roof tiles.
