

BASIC SERIES

IDEAL FOR PREVENTING BIRDS FROM NESTING UNDER NEW SOLAR PANELS

Medium-strength barrier designed for solar panels not yet infested with birds. Suitable for mounting in conjunction with the installation of new photovoltaic systems.

- ✔ Birds will no longer be able to access and nest under your photovoltaic systems
- ✔ It mounts frontally to the metal frame of the solar panel using special clamps
- ✔ Pre-painted and zinc coated steel comb supplied in coils of the length required
- ✔ Alu-Inox steel clamps available in Black color
- ✔ Does not require use of adhesives or silicone glue
- ✔ Universal for all types of solar panels and roof tiles

Quality

Bird blocking system optimized for maximum value for money

Practicality

Quick and easy installation, requiring only an Allen wrench

Safety

Preserves solar panels' warranties and the validity of any incentives such as GSE

Versatility

Will adjust to any type of roof tile and photovoltaic panel

Functionality

Maintains the natural ventilation of photovoltaic modules

Convenience

Can be disassembled and reassembled countless times in case of roof maintenance

UNIVERSAL BIRD BLOCKER SOLUTION MEDIUM-STRENGTH BARRIER

Code: IS-BAS-PB

Specifications:

- Pre-painted and zinc coated steel combo available in brown colour or INOX stainless steel
- Supplied in coils of the length required
- Thickness: 0,6 mm
- Spike Length: 17 cm

ANCHORING CLAMP KIT ALU-INOX

Code: ISI-BAS-MB

Specifications:

- Aluminum alloy clamp
- Black color for 30/55 mm frame
- Length 40 mm
- Clamp support for Inox comb

Code: IS-BAS-P16/P28

Specifications:

- M8X35 Inox screw for 6 mm Allen wrench
- Inox M8 tower nut
