

TOP SERIES

IDEAL FOR MOUNTING ON BIRD-INFESTED SOLAR PANELS

Highly resistant bird barrier designed to permanently prevent birds from accessing and nesting under solar panels.

Suitable for all situations, even in the most critical cases.

- ✔ It mounts under the solar panel frame using special clamps
- ✔ Stainless steel comb supplied in pieces 1.2 m long
- ✔ Alu-Stainless steel clamps available in Silver and Black color
- ✔ Does not require use of adhesives or silicone glue
- ✔ Comb designed with an Easy Cut system for manual cutting
- ✔ Universal for all types of solar panels and roof tiles

Resistance

Made of stainless steel, a long-lasting and rustproof material

Practicality

Quick and easy installation, requiring only an Allen wrench

Safety

Preserves solar panels' warranties and the validity of any incentives such as GSE

Versatility

Will adjust to any type of roof tile and photovoltaic panel

Functionality

Maintains the natural ventilation of photovoltaic modules

Convenience

Can be disassembled and reassembled countless times in case of roof maintenance

UNIVERSAL STAINLESS STEEL HIGH RESISTANCE BIRD BARRIER COMB

Code: IS-TOP-P16

Specifications:

- Stainless steel alloy
- Easy Cut System
- Length: 120 cm
- Thickness: 1 mm
- Spike Length: 16 cm

Spike heights available (non-standard):

Code: IS-TOP-P20 - H. 20 cm

Code: IS-TOP-P24 - H. 24 cm

Code: IS-TOP-P28 - H. 28 cm

ANCHORING CLAMP KIT ALU-INOX

Code: IS-TOP-MS

Silver color for 30/55 mm frame

Code: IS-TOP-MB

Black color for 30/55 mm frame

Specifications:

- Aluminum alloy clamp
- Length: 60 mm
- Clamp support for Inox comb

Code: IS-TOP-P16/P28

Specifications:

- M8X35 Inox screw for 6 mm Allen wrench
- Inox M8 tower nut
